## HISTORICAL SKETCH

---

The South Carolina Military Academy, more familiarly known as "The Citadel," had its origin in a military necessity. Previous to the year 1841, the State of South Carolina had two depositories for its arms and munitions of war; one known as the Citadel in the city of Charleston, the other known as the Arsenal, in the city of Columbia. These were guarded by companies of enlisted men under trained officers, and were maintained at an expense of \$24,000 per annum.

It was Governor Richardson who made the suggestion that these garrisons be replaced by young men, who, while serving as a guard, should receive military training and instruction in the practical and mechanic arts. Under the administration of his successor, Governor Hammond, an Act of the Legislature was passed on December 20, 1842, creating the Citadel and Arsenal Academies.

The Board appointed by the Governor to carry out the purpose of the Act lost no time in performing their duty, and the faculty of the Citadel was elected on February 23d following. By the 20th of March, both the Citadel and the Arsenal were in operation.

In arranging the course of studies for the Citadel, the report of the Board to the General Assembly says:

"The Board have aimed at a system of education at once scientific and practical, and which, if their original design is carried out, will eminently qualify the Cadets there taught for almost any station or condition of life.

"During the course, besides the usual branches taught at the primary schools in the State, they will be instructed in the History of South Carolina, modern history, the French language, every department of the mathematics, bookkeeping, rhetoric, moral philosophy, architectural and topo-

graphical drawing, natural philosophy, chemistry, geology. mineralogy, botany, civil and military engineering, the constitutional law of the United States, and the Law of Nations, In addition to that course, they will be instructed in the duties of the soldier, the School of the Company, and of the Battalion; the Science of War, the Evolution of the Line, and the duties of commissioned officers."

The Arsenal, at first co-equal with the Citadel, was soon incorporated with it, and had for its special function the instruction and training of the recruits, forming what was known as the Fourth Class.

The first class, numbering six men, was graduated in 1846. C. C. Tew, the first honor man of his class, and the proto-graduate of the institution, afterwards founded the Hillsboro Military Academy, North Carolina, was Colonel of N. C. troops in the Confederate Army, and was killed at Sharpsburg, September, 1862, while commanding Anderson's brigade.

The value to the State of the military training given at the Citadel is strikingly shown by the fact that of the two hundred and forty graduates before the close of the Civil War, about two hundred were officers in the Confederate service, and forty-three laid down their lives upon the battlefield. The list of Citadel officers in that great conflict is an honor roll of which any institution may well be proud.

There are two dates in the history of the State Military Academies which mark the boundaries of this greatest military struggle of the century. Between January 9, 1861, and May 9, 1865, what a tragic history was enacted!

On the first date, Major P. F. Stevens, Superintendent and a graduate of the Citadel, in command of a detachment of Citadel Cadets, manning a battery of 24-pounders on Morris Island, drove off the steamer "Star of the West," which was attempting to relieve Fort Sumter—thus firing the first hostile shot of the War.

On the latter date, Capt. J. P. Thomas, Superintendent of the Arsenal, and also a graduate of the Citadel, with the Cadets of his command had a skirmish with Stoneman's

raiders near Williamston, S. C., thus firing the last shot of the war, delivered by any organized body of troops east of the Mississippi River.

At the present time, the Corps of Cadets has an annual competitive drill for the "Star of the West" medal, a handsome trophy for the best-drilled cadet of the Corps, presented to the institution many years ago by Dr. B. H. Teague, a veteran of the War. This medal gets its name from a piece of oak wood, in the form of a star, taken from the historic vessel.

At the fall of Charleston in February, 1865, the Citadel was occupied by Federal troops. The Corps of Cadets was at that time in the field in the upper part of the State, and never returned to the institution, which continued in the hands of the U. S. military authorities, in spite of the best efforts of the State to recover it, until 1881.

In that year, Governor Hagood said in his annual message to the General Assembly:

"The State Military Academy at Charleston has been suspended in its operations since the late civil war. This has been due to the fact that the building known as the Citadel, in which it had its seat, has been since the close of the war in possession of the U. S. authorities, and has been used by them until recently as a military post.

"It is understood that the General Government is now prepared to restore it to the custody of the State. It is desirable that this property be recovered and again devoted to the purpose of higher education, in the facilities for which our needs are greater than the source of supply.

"A measure will probably be submitted to you at this session to accomplish this purpose; and you will permit me to say that, in my judgment, it is now practicable to re-open the School, and it ought to be done."

An act to authorize the re-opening of the South Carolina Military Academy was passed by the General Assembly, and approved January 31, 1882.

The Citadel was re-opened on October 1, 1882, with 189 Cadets, and has been in continuous and successful operation ever since.

In 1888, the sum of \$77,250 was recovered from Congress for the occupation of the Citadel building by the Federal troops and for the destruction by fire of the West Wing while occupied by them. With this fund, the Wing was restored, and the building thoroughly equipped in its departments. 1908

In 1898, the Central Police Station, which was erected on the King street end of the Citadel property just after the earthquake in 1886, was purchased by the State and fitted up for the use of the Academy, at an expense of over \$40,000.

With enlarged capacity, better facilities, and with the prestige of a long and distinguished record in the past, the Citadel looks to the future to carry forward its work in the education of the young men of the country.

## Scope

The Citadel asks a liberal meaning for the term academy, This term "Academy" in its title arose from the fact that it was modelled after the Military Academy of the United States. It is a branch of the University of South Carolina. and its course and methods are those of a college, its degrees admitting graduates to the post graduates courses of the greater Universities.

It is designated by the War Department as one of the honor military schools of the United States, and its graduates are qualified for commission in the United States Army.

Following are a few extracts from the reports of official inspections:

"The discipline, military instruction, bearing and general appearance of Cadets; the general care and condition of arms and equipments; and the entire military aspect of the military department of this Academy, admits of no comparison to any of the colleges with which I have had experience. It is so superior in all its methods, scope, appointments, and

its distinctive military features, that it must be classed alone, and can only be compared to our National Military Academy."

LT. COL. G. H. BURTON, Inspector General, U. S. A.

"It is my opinion that a young man who wins a diploma at this Institution, under the present system, is well qualified to command infantry troops."

MAJ. E. A. GARLINGTON, Inspector General, U. S. A.

"A number of reports of previous inspections were shown me, and I can say, with emphasis, that the high standings therein mentioned have been fully maintained."

MAJ. WM. R. HAMILTON, U. S. A.

"Any one of them (members of the Senior Class) I would be glad to have in my own company as a lieutenant; this is the best summary that I can give."

CAPT. ALSTON, HAMILTON, U. S. A.

"An Institution of the character of the South Carolina Military Academy should receive every possible encouragement from the United States Government."

MAJ. JNO. S. MALLONY, U. S. A.

"It is substantially a military school in all its features, and is one of the oldest and best known military Institutions in the South."

LT. COL. H. W. LAWTON, U. S. A.

"It is modelled on the plan of the United States Military Academy at West Point, with which in some respects it may be favorably compared."

MAJ. J. P. SANGER, U. S. A.

## Location

The Citadel is situated in the center of the city of Charleston, a city noted for its culture and refinement, and full of associations dating from the earliest times of American history.

The climate of Charleston is mild and healthful, being free from the rigors of the severe winters experienced further north and in the interior cities, and tempered in summer by constant sea-breezes.

The Citadel fronts on Marion Square, the largest and one of the most beautiful open squares in the city, and the drill and parade ground of the Corps of Cadets.

## **Buildings**

The Citadel buildings consist of a Main central building, the East and West Wings, the King Street Extension, and the Gadsden Gymnasium. The Cadets are quartered in the Main building, which is built in the form of a rectangle surrounding a large interior court called the Quadrangle, where the ordinary formations of companies and classes are made. The second and third floors of this building are devoted almost exclusively to the dormitories of Cadets, and are known as Cadet Barracks.

The King Street Extension is a large three-story structure containing on the first floor the Mess Hall and Kitchen, on the second the Drafting Hall, and on the third floor, the Infirmary.

The East Wing contains the Chapel, the Chemical, Physical, and Geological laboratories, the Laundry, and class rooms.

The West Wing is reserved entirely for officers' quarters,

The Guard room, Reception room and Library are on the first floor of the Main Building. The Gymnasium Building lies between the Main Building and the West Wing, and is reached from the Quadrangle through the West sally port.

The entire group of buildings is heated by a hot water system, which guarantees a uniform winter temperature of 70° throughout, and is lighted by electricity.

## **Academic Year**

Excepting ten days at Christmas, the Academic year consists of one continuous session, beginning October 1st and ending the last week in June.

It is divided into three terms of three months each, and examinations are held at the end of each term, after which reports showing the record of the cadets in studies and conduct are sent to parents and guardians.

A distinguishing feature of the Commencement exercises is that they are ordinarily held at the place of the annual encampment and not always in the City of Charleston. These exercises include the Baccalaureate Sermon, which is delivered on the last Sunday of the encampment, generally by some alumnus of the Academy; the annual competitive drill between the companies of the battalion; the individual drill for the "Star of the West" medal; the annual review and inspection of the Corps by the Board of Visitors; and the graduating exercises on the final day of the encampment, consisting of the annual address by some prominent statesman or scholar, addresses by two Cadets of the graduating class, and the awarding of diplomas and degrees by the Chairman of the Board of Visitors.

Following is a list of the Commencement speakers for the past ten years:

- 1899. At Orangeburg, S. C., baccalaureate sermon by Dr. H. W. Bays, address by Senator B. R. Tillman.
- 1900. At Charleston, S. C., Rev. Geo. H. Cornelson, Class of 1888, and Hon. Stanyarne Wilson, Congressman from South Carolina.
- 1901. At Darlington, S. C., Rev. Albert S. Thomas, Class of 1892, and Hon. R. B. Scarborough, Congressman from South Carolina.
- 1902. At Charleston, S. C., Rev. John G. Beckwith, Class of 1892, and Dr. Jas. A. B. Scherer, Pastor of St. Andrew's Church, Charleston, S. C.
- 1903. At Rock Hill, S. C., Rev. F. W. Gregg, Class of 1894, and Gen. Edward McCrady, Historian of South Carolina.
- 1904. At Charleston, S. C., Rev. W. Postell Witsell, Class of 1894, and Hon. Geo. S. Legare, Congressman from South Carolina.

1905. At Columbia, S. C., Rev. A. N. Brunson, Class of 1888, and Prof. Wm. Spencer Currell, of Washington and Lee University.
1906. At Charleston, S. C., Rev. S. H. Booth, Class of 1895, and Hon. M. L. Smith, Speaker of the S. C. House of Representatives.
1907. At Norfolk, Va., Rt. Rev. A. M. Randolph, Bishop of Southern Virginia, and Hon. M. F. Ansel, Governor of South Carolina.
1908. At Charleston, S. C., Rev. Geo. H. Atkinson, Class of 1893, and Prof. W. E. Mikell, of the University of Pennsylvania.
1909. At Sullivan's Island and Isle of Palms. Rev. B. G. Murphy, Class of 1896, and Col. Asbury Coward, Class of 1854.

### **Military Session**

A military session, devoted exclusively to military instruction in camp and field work, is held usually at the end of the third term. Sometimes a practice march of two weeks is held at the close of the second term instead.

The annual target practice is held in the spring, and a marksman's medal, to be worn for a year, is awarded to the cadet making the best record.

Following is a list of the various encampments which have been held in the past twenty years:

1889. Greenville, S. C.
1891. Spartanburg, S. C.
1892. Fort Moultrie, Sullivan's Island, S. C.
1893. Aiken, S. C.
1894. Yorkville, S. C., march to Kings Mountain battlefield and return.
1895. Camden, S. C., march from Columbia to Camden.
1896. Sumter, S. C., visit to battlefield of Eutaw Springs.
1897. Anderson, S. C., march to Clemson College and return.
1899. Orangeburg, S. C.
1901. Darlington, S. C.

- 1903. Rock Hill, S. C., march to Indian Shoals Power Dam and return.
- 1904. St. Louis Exposition.
- 1905. Columbia, S. C.
- 1906. Practice march to Pinopolis, S. C., and return.
- 1907. Jamestown Exposition.
- 1908. Practice march to Walterboro, S. C., and return.
- 1909. Coast Artillery Fortifications, Sullivan's Island, S. C.

## **System of Management**

The system of management is based on that of the Military Academy at West Point, and has reached such a point of excellence as to warrant a comparison with it and entitle the Academy to the cognomen of the "West Point of the South." There is this difference to be noted: That, whereas at West Point the aim is to make well-trained soldiers, the military feature of this Academy is used as a means to attain an end, and that is, to send forth from its walls disciplined citizens. Many of its graduates, however, are now officers in the United States Army.

Throughout the whole course a military surveillance is maintained over the Cadet's life; everything is required to be done punctually and according to system. From reveille to taps the Citadel Cadet passes a full and busy day, every hour of his time being accounted for, and its appropriate task assigned. The regular habits thus assured may account for much of the success of after-life. An atmosphere of success seems to cling round the greater number of those who have had associations with the Citadel. Though the list of its graduates records fewer than a thousand, it is crowded with the distinguished names of those who have achieved success in a multitude of different callings.

## **Religious Services**

The religious training of Cadets is provided for by daily chapel services attended by the Corps, and by attendance on Sunday mornings at the services in the various churches of

the city. The institution being non-sectarian, the Cadet companies are assigned in rotation to the various Protestant churches, but occasionally special individual leave is granted Cadets who are communicants to attend the services and commune at some church of their particular denomination. Cadets of the Roman and Hebrew faiths are excepted from the above rule when request is made, and form special squads which attend only the services of their own faith.

A flourishing branch of the Y. M. C. A. is established in the institution, and services are held in their hall on Sunday and Wednesday evenings throughout the session.

A Bible Class meets weekly on Sunday morning.

The military system works not only for the good health but for the morals of the Cadets. Moreover, the barrack life of the students precludes much waste of time or loss of character.

Cleanliness, temperance, regularity, and courtesy are insisted on, and personal responsibility and a high sense of honor are stimulated and developed.

### **Course of Studies**

The course of studies for the first three years is obligatory, all Cadets doing the same class-room work. In the last year, half of the studies are taken by the class together, and the other half must be selected from one of the following electives: Engineering, English, Chemistry, or Physics.

Note: Students are advised not to purchase any text-books before coming to the Academy, as they are subject to change.

#### **FIRST YEAR—FOURTH CLASS**

Mathematics, 5 hours a week, 9 months. Fisher and Schwatt's Higher Algebra; Milne's Plane and Solid Geometry.

Physics, 4 hours a week, 9 months. Hall and Bergen's A Text-book of Physics; Pierce's Problems in Physics.

English, 4 hours a week, 9 months. Newcomers Composition and Rhetoric; English Classics.

History, 2 hours a week, 9 months. West's Ancient and Medieval History.

French, 3 hours a week, 9 months. Fraiser and Squair's French Grammar; reader.

Military Science, 1 hour a week, 9 months. Infantry Drill Regulations, U. S. Army.

Total hours a week.....19

#### SECOND YEAR—THIRD CLASS

Mathematics, 5 hours a week, 9 months. Crockett's Plane and Spherical Trigonometry; Raymonds Surveying, with Field Practice; Lectures; Theory of Equations.

Chemistry, 4 hours a week, 9 months. Remsen's Introduction to the study of Chemistry; Treadwell's Analytical Chemistry.

English, 4 hours a week,  $4\frac{1}{2}$  months. Select English Classics; Creighton's Logic.

History, 4 hours a week,  $4\frac{1}{2}$  months. West's Modern History; Andrew's England.

French, 3 hours a week, 9 months. Fraiser and Squair's Grammar completed; French texts.

Drawing, 3 hours a week, 9 months. Mechanical Drawing; Topographic Drawing.

Military Science, 1 hour a week, 9 months. Guard Manual, U. S. Army; Firing Regulations for Small Arms.

Total hours a week.....20

#### THIRD YEAR—SECOND CLASS

Mathematics, 5 hours a week, 9 months. Tanner and Allen's Plane and Solid Analytic Geometry; Taylor's Differential and Integral Calculus; Lectures on History and Philosophy of Mathematics.

Physics, 4 hours a week, 9 months. Hall and Bergen's Physics, completed; Watson's A Text-book of Physics; Pierce's Problems.

English, 4 hours a week, 6 months. Arden Edition of Shakespeare; Johnson's English and American Literature; Lectures; Winchester's Literary Criticism; Essays.

History, 4 hours a week, 3 months. Hart's Formation of the Union; Wilson's Division and Reunion.

German, 3 hours a week, 9 months. Vos' Essentials of German; reader.

Drawing, 3 hours a week, 9 months. Low's Elementary Machine Drawing and Design.

Military Science, 1 hour a week, 9 months. Field Service Regulations.

Total hours a week.....20

#### FOURTH YEAR—FIRST CLASS

Engineering (elective), 10 hours a week, 9 months. Integral Calculus; Analytic Mechanics; Hydromechanics; Mechanics of Materials; Roofs and Bridges; Elements of Sanitary Engineering; Drawing; Use of Surveying Instruments; Lectures.

English (elective), 9 hours a week, 9 months. Extensive Reading of Classic English Prose at the rate of 2,000 pages a month, minimum; Analysis by the Cadets; Lectures on Literary Forms; Original Orations; Shakespeare's Dramas, with Lectures on Dramatic poetry; Literary Study of the English Bible, with examinations of the Biblical Literary Form, and extensive reading of the Modern Reader's Bible; and Fullerton's and Alden's Intellectual Philosophy.

Physics (elective), 10 hours a week, 9 months. Electricity and Magnetism; Electrical Measurements; Laboratory work.

Chemistry (elective), 10 hours a week, 9 months. Treadwell's Analytical Chemistry; Moses and Parsons' Mineralogy.

Political Science, 2 hours a week, 9 months. Economics; State and Federal Constitutions; International Law.

German (elective), 3 hours a week, 9 months. Vos' Grammar, completed; Pope's German Composition; German Texts.

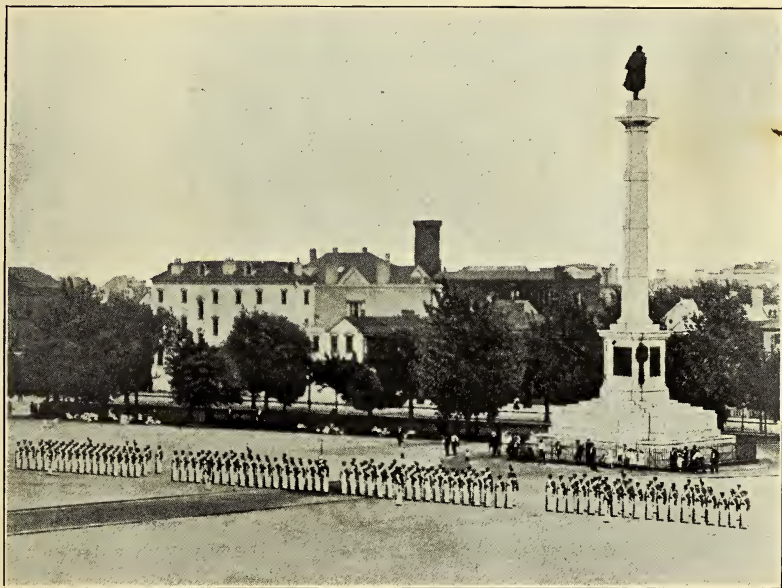

Spanish (elective), 3 hours a week, 9 months. Hill's and Ford's Spanish Grammar; reader; Spanish texts.

Military Science, 2 hours a week, 9 months. Military Engineering; Laws of War; Practice of Court's Martial.

Geology, 2 hours a week, 9 months. Brigham's Geology.

Bookkeeping and Commercial Law, 2 hours a week, 9 months.

Total hours a week.....21

CADET BATTALION DRESS PARADE

# DEPARTMENTS OF INSTRUCTION

---

## Mathematics and Engineering

The method of instruction in this department is by textbook and recitation, supplemented by lectures and field work. Much of the history and philosophy of the various branches is incidentally given by lecture. It is sought to make the subject interesting as well as instructive. The aim is, primarily, to draw out and develop the powers of the student, to train his faculties rather than to cram his mind with information undigested and not assimilated.

FOURTH CLASS.—Arithmetic and algebra through quadratic equations are the requirements prescribed for entrance upon the course. After some review of the elements, advanced algebra and plane and solid geometry are given.

THIRD CLASS.—Plane and spherical trigonometry and surveying are given during the second year. This part of the course is theoretical and practical. The department is well equipped with transits, levels, compasses, sextant, plane-table, chain and rods. Field work is done by the students under the direction of the instructor. Actual surveys are made and areas determined. In addition to land surveying, the course includes railway surveying and construction, mine surveying, hydrographic surveying and triangulation. The making of maps and profiles is in the Drawing Department. During the last part of the session there is given a course in theory of equations, preliminary to the subjects which follow in the third and fourth years.

SECOND CLASS.—Plane and solid analytic geometry and calculus are the subjects for the third year. In analytic geometry, while the straight line and the conic sections receive as usual the most study, some of the higher curves are treated and due attention is given to planes and solids.

Differential and integral calculus are studied in connection with each other. The three methods commonly used in the calculus are presented, and the advantages of each made apparent. The calculus is taught not as pure theory alone, but the student is made to see what an efficient means it is of solving practical questions in engineering and physics.

FIRST CLASS.—The course in mathematics and civil engineering during the last year comprises integral calculus, analytic mechanics, hydromechanics, mechanics of materials, roofs and bridges, and elements of sanitary engineering. The problem of central forces with Newton's solution is given, in addition to the engineering subjects proper. These include the principles underlying the use and effectiveness of machines; the pressure of water against dams and embankments; the flow of water in pipes, rivers and canals; water supply and sewerage; the horse power of streams; the strength of beams, columns and shafts; the proper design of the steel and iron pieces now so generally used in building; and the stresses in the simple forms of roof and bridge trusses. Some instrumental work additional to that in the second year is done.

The class is kept informed of the latest practice as set forth in *The Engineering News*.

## English

FOURTH CLASS.—Composition and rhetoric: reading and study of English Classics. Much time is given to writing compositions. In this year the aim is to give the cadet a masterly knowledge of the English sentence, the practice work being for the most part in the field of description and narration. In the study of the English Classics, it is the purpose of those in charge of the department to have the cadet make a good beginning in preparation for the advanced work of the second and first classes in literature. Familiarity with a few examples of the literature is to be established first of all. Grammar, idiom, and individual style are all carefully noted; and at the close of the year the cadet has a proper appreciation of good literature.

THIRD CLASS.—For a few weeks an advanced course in rhetoric is given, with especial attention to the paragraph, its nature and development. The principles of good writing are put in practice, and the cadet is made a critic of his own work. Reading and study of the English Classics is continued, the object all the time being to enlarge the cadet's familiarity with his own language and literature in the best forms. A course in logic, inductive and deductive, is then begun; and the nature and processes of thought are presented to the class in such a way as may enable the members to approach nearer to correct thinking in all their studies.

SECOND CLASS.—The reading and study of English Classics is continued in connection with the history of English literature and American literature, in periods. This includes the lives of the writers and extended criticism of their works, with striking examples examined and interpreted according to the methods previously practiced. Written examinations every three months, written recitations, and the preparation of original essays, keep fresh in mind the value of the work done in rhetoric.

FIRST CLASS.—The English in the First Class is elective, and is allowed ten hours each week throughout the year. The student pursues an extensive reading of classic English prose, usually completing the study of only one author's works each month, at the rate of two thousand octavo pages a month minimum. The personal life of the author, and the special forms of literature that his works illustrate, are carefully investigated; and during the month papers are submitted showing in detail the cadet's progress. Original orations are written and delivered each month. From week to week the Professor lectures on the application of literature to life, and endeavors to stimulate the cadets to become masters of their own literature, and exponents of the value of literary culture. One month, ten hours weekly, is given to the study of Shakespeare's dramas, with lectures on dramatic poetry; and one month is spent on the literary study of the English Bible, with appreciations of the biblical forms. The history of philosophy has been scheduled in this year's work, and taken out of the Second Class course.

## History and Political Science

FOURTH CLASS.—Ancient and medieval history are studied throughout this year. Emphasis is laid on the proper methods of historic study, and the cadet is advised to utilize his knowledge for practice work in the department of literature. Careful attention is paid to map work. Parallel reading is encouraged; and, in the written examinations, neatness in composition is given due credit.

THIRD CLASS.—Modern history and the history of England in particular are studied during this year. In modern history the cadet is taught to realize the world he lives in by an appreciation of the particular events that have evolved the national life of our day; and while studying the history of England, the cadet's attention is directed to the value of the study as a background for the study of English literature. Furthermore, the history of England furnishes an opportunity for the cadet to understand the constitutional development which is treated more fully in the First Class. Attention is paid to geography and collateral work.

SECOND CLASS.—For about three months, four hours weekly, the members of this class resume the study of American history. A fair knowledge of the history of the United States is required of all applicants for entrance; but in the Second class a closer examination of our history is made, and special emphasis is laid on the events that underlie the development of our Constitution.

FIRST CLASS.—A very strong supplementary course of collateral reading in history is afforded by the course in literature as outlined elsewhere. When authors such as De Quincey, Carlyle, Macaulay, Hallam, and others, are under consideration, the reading of their histories and historical essays during the ten-hour weekly period furnishes a valuable extension of historical knowledge, that is keenly appreciated by those who elect this course. Political economy is one of the subjects carefully treated in this year; and a course in civics is given covering the constitution and the government of the United States and of South Caro-

lina. In the courses of literature and history, there is a continual demand made that the students strive by every means to increase their vocabulary, to be ready and direct in their utterance in oral recitation, and particularly to consider themselves as working in a laboratory, making use of every source of information at hand, appropriating every allusion and direct reference by maps, encyclopedias, and the special volumes in the library suitable for their instruction.

## Modern Languages

The work of this department is required of all students of the Academy. The first two years are devoted to the study of French. The third year takes up German, while in the fourth year, it is optional for the students either to continue their work in German or to take one year of Spanish. The object of the work in this department is to give the student a thorough knowledge of the grammar and to acquaint him with the literature of these languages. After completing the course, one is able to pursue advanced work with pleasure and profit.

### FRENCH

FOURTH CLASS.—Elementary French Grammar; translation; composition; reading; writing from dictation. A constant drill in the grammatical forms is given throughout the entire year. The more common irregular verbs are mastered. In the latter half of the year a reader is used.

THIRD CLASS.—Advanced grammar one hour a week, in connection with the translation of a connected account of a trip to France. The literature of the language is studied, and a taste for the best writers cultivated. Idiomatic constructions are emphasized, and at the end of the year the student is expected to understand any construction he may meet in French.

### GERMAN

SECOND CLASS.—Elementary German grammar; translation; composition; reading; writing from dictation. Drill in the grammatical forms is continued to the end of the year. In the second half of the year a reader is used.

FIRST CLASS.—Advanced grammar, and the writing of themes based on the activities of German life; texts from the best writers are read and studied. Accuracy of knowledge and correctness of expression are aimed at rather than quantity. If sufficient men offer themselves, a course in Scientific German will be given.

## SPANISH

FIRST CLASS.—For those men who decline German in their senior year a course in Spanish will be given. The grammar will be studied throughout the year, and in connection with it exercises based on the text will be given. A reader will be used in conjunction with the grammar, and if time permits some easy stories will be read during the latter part of the year.

## Physics

FOURTH CLASS.—After some preliminary work in mensuration and meaning of units, individual experiment work is taken up. The aim is to cover thoroughly but in an elementary way, definitions, standards, fluid pressure, equilibrium of forces, center of gravity, machines, work, couples, friction. This year is devoted largely to experimental work and the solving of elementary problems in physics. Relations are stated in mathematical language, usually accompanied by an interpretation of the equation.

SECOND CLASS.—The character of the course during the first three months of this year is like the course begun the first year. Light, as such, optical instruments, properties of solid bodies, motion, action and reaction, work and energy, temperature, conveyance of heat, expansion, changes of physical state, transformation of heat, sound. The work continues largely experimental.

The last six months of the year are devoted to the development of the principles of the science. It will be taken for granted that the work covered previously has given the student an appreciation of specific thought and that he is in a position to pursue the subject as developed in such texts as Watson's Physics, which is the book used.

No attempt is made to cover any specific amount of laboratory practice. But the determinations that are made call for certain refinements.

FIRST CLASS.—A course in electricity is offered as an elective. Elementary electrostatics, laws of magnetism, laws of voltaic electricity, electro-magnetic induction. The Wheatstone Net. Theory and practice of the dynamo, motor and the transformer.

## Chemistry

THIRD CLASS.—The common elements and their most important compounds are first studied, together with the fundamental laws underlying chemical phenomena. The text book is supplemented by experiments and a few lectures. Analytical chemistry is taken up during the latter part of the year's work. In this course the student does laboratory work in systematic qualitative analysis, learning how to detect metals and acids in compounds and mixtures.

FIRST CLASS.—The course offered here is an extension of the second year's course and includes qualitative analysis and theoretical chemistry. After having learned how to separate the groups of metals and acids in unknown solutions, the examination of potable waters, minerals and ores is taken up. The various chemical re-actions carried out in the laboratory are thoroughly considered in the class room; these chemical equations are reasoned out and also are considered from the Ionic Hypothesis. Throughout the teaching of chemistry a twofold object is kept constantly in mind—the acquirement of chemical knowledge and manipulation, and the development of the reasoning powers. There is no science or study which offers better opportunities for the development of the reason and the application of the known to the unknown than the science of chemistry, and as much of the time as is possible is given to this phase of the study.

A course in mineralogy embracing descriptive mineralogy and determinative mineralogy is given during this year. In descriptive mineralogy specimens are freely used; at each

lesson an example of all the species to be studied being placed before the students, while free access is to be had to a collection of typical specimens. In determinative mineralogy instruction is given in the determination of minerals by blow-pipe and chemical tests as well as by certain physical properties.

## **Geology**

**FIRST CLASS.**—In geology the principles of dynamic geology are first taken up—the forces which have fashioned and modified, and are still modifying, the surface of the earth. Next are considered some of the results of these forces as seen in the structure, of the rocks in volcanoes, earthquakes, faults, crust movements, etc. During the latter part of the course the life history of the earth as recorded in the rocks is studied.

## **Department of Military Science**

The instruction in this department involves throughout the four years' course practical exercises in drill, guard duty, military ceremonies, practice marches, target practice, and the solution of tactical problems in the field. There is drill five hours a week throughout the year; and guard mount is conducted daily, other ceremonies being conducted at stated intervals. In addition to these, there is class room work in sequence in the United States Army Drill Regulations, the Manual of Guard Duty in barracks and in camp, firing regulations for small arms, field service regulations, international law, military field engineering, military law and practice of military courts, and the laws of war. The aim kept in view is the thorough equipment of the graduates of the institution to discharge intelligently and effectively the duties of an officer of the army.

## **Drawing**

The course in drawing begins in the Third Class, and covers three years. An effort is made throughout the course to keep it in touch with the best drawing office practice, and to afford instruction which shall be of immediate, practical

READING ROOM

DRAWING DEPARTMENT

value to those cadets who take up engineering as a profession. The department is abundantly supplied with drawings, sketches, specifications, catalogues, and other material of this kind secured from leading manufacturers of machinery. The work in drawing is outlined with reference to its value in designing and constructing, and the above mentioned material consequently forms the basis for a large amount of the work.

**THIRD CLASS.**—Each cadet is supplied with a complete outfit of drawing instruments, and their use and care is explained. Free-hand lettering is then taken up, after which the more useful geometrical constructions are drawn. Orthographic projection follows, and takes up a greater part of the time allotted the class. Sections, developments, intersections of surfaces and solids, shading, elementary working drawings, and tracing are then taken up in the order mentioned.

Simultaneously with the course in surveying, the Third Class is instructed in the methods of plotting, and making of profile and topographic maps.

The work is so arranged that those cadets who desire to go on in advance of their class are permitted to do so.

**SECOND CLASS.**—This class takes up the subjects of working drawings and elementary machine drawing and design. The various purposes for which drawings are made, drawing office and shop methods, and the design of various machine details are discussed. Screw threads, bolts and nuts, rivets, pulleys, link motions, quick return motions, engine movements, cams, couplings, bearings, engine details, and various other machine parts are drawn. In every exercise assigned some problem of design is involved, and the specifications for the plates are furnished in such form that the student must have a mental picture of the object before he can draw same. Mere copying exercises are not given. Great stress is laid on accuracy and completeness in the drawings, proper figuring and lettering, and shading for illustrative purposes is briefly considered. Numerous lectures are given on the strength and properties of the

materials used in machine construction, and various problems involving the principles discussed are assigned. Tracing and blue-printing are included in this course.

As in the preceding class, opportunity is afforded for those who so desire to go on in advance of their class.

**FIRST CLASS.**—The engineering section of this class has two hours a week in structural drawing. Foundations, roofs, bridges, and various details of construction are taken up. The graphical method of analyzing structures is closely studied in this class. Complete drawings of various framed structures with stress sheets and detail drawings are required. This course is based on a large collection of structural drawings secured from the manufacturers.

### **Bookkeeping and Commercial Law**

The aim of this department is to give the student an acquaintance with business transactions, and the most recent methods of keeping accounts, and with the law of contracts. The ordinary transactions of business houses of various kinds are analyzed, and the use of the different books studied. Frequent drill is given in making balance sheets, and closing the ledger. Absolute accuracy, and a strict observance of commercial ethics are insisted upon.

### **Literary Societies**

There are two literary societies in the Corps, the Calliopean, organized in 1845, and the Polytechnic, two years later. These societies are officered and controlled entirely by the Cadets. They have comfortably furnished halls, and hold meetings on Saturday night of each week. Frequently during the session, upon the invitation of the societies, men of note deliver addresses before the Corps and their friends upon literary topics.

The societies of the Citadel send a representative each year to the oratorical contest of the South Carolina Oratorical Association, which is composed of all the colleges of the State; they also engage in an annual joint debate with the societies of the College of Charleston.

While these societies are strictly in the hands of the Cadets, the work done by them is considered second to that of no department in the institution in its educational value.

## Library and Reading Room

The Library has recently been moved to much larger and more convenient quarters. It contains a large number of books of reference for all the departments of the Academy, besides being well supplied with works of standard and current fiction. It is catalogued and in charge of a competent librarian.

The reading room is a large, airy, and well-lighted room on the ground floor, directly accessible from the Quadrangle, and is supplied with the following magazines:

American Machinist	Literary Digest
American Magazine	Littell's Living Age
Appleton's Magazine	McClure's
Army and Navy Journal	Modern Language Notes
Atlantic Monthly	Munsey's
Bookman	Nation
Century Magazine	North American Review
Chautauquan	Putman's Reader
Circle	Review of Reviews
Collier's	Saturday Evening Post
Cosmopolitan	Science
Engineering News	Scientific American
Everybody's	Scribner's
Forum	Success
Harper's Magazine	Uncle Remus' Home Magazine
Harpers' Weekly	World To-Day
Leslie's	Youth's Companion
Life	New York Herald
Lippincott's Magazine	

## Gymnasium

The Gadsden Gymnasium, built and equipped in 1905, is an auxilliary in the physical development of the Cadets.

The climate of Charleston, permits open air exercise throughout the year, and the setting up exercises, Butt's Manual, daily drill, etc., on Marion Square, and the sports of the Cadets furnish the best means of securing bodily health and growth, but special attention may be given to those Cadets who may need particular exercises for specific needs.

The coaches for the Football and Baseball teams are competent and experienced, and use due care to prevent injurious training on the part of Cadets who engage in these sports.

## **Athletics**

It is the policy of the institution to give every reasonable encouragement to athletics, and to see that all contests are conducted on a clean, amateur basis. The athletic interests are controlled by a well-organized cadet athletic association under the supervision of a faculty athletic committee. The Citadel is a member of the Southern Inter-Collegiate Athletic Association and of the local Amateur Federation.

During the past session great advances were made in the development of the various branches of athletic sport. A track team was organized and a large number of cadets engaged in this sport, and the corps gave it their enthusiastic support. The team easily won the local championship, and throughout the season a high order of athletic merit was exhibited. A feature of this branch was the First Annual Track and Field Day, in which the classes contested for a handsome silver cup given by the officers of the Academy. The football team lost only one game, that to the State University; and, through its defeat of the Mercer University team, gained a place among the formidable teams of the South. There was ample material for a strong baseball team, but owing to the failure of the coach to take charge, the team was not properly developed.

Another improvement was the reorganization of the Athletic Association. This is now on a sound basis, and all of its affairs are administered in a business-like manner.

The healthy *esprit du corps* of the cadets has been strikingly illustrated in the hearty support which has been given the teams, and the active interest which has been taken in the various class games. Athletics have no higher claim on the support of institutions than the fact that they arouse this fine spirit of loyalty; and at the Citadel there is no more valuable asset.

### **Association of Graduates**

The Association of Graduates was organized in 1877, since which time it has been an active agent in promoting the best interests of the alma mater. The annual meeting and supper are held at the Citadel at the time of the Commencement Exercises in June.

The "Bulletin," a quarterly publication issued by the Association, keeps the graduates and ex-cadets informed of the principal transactions at the Academy, besides containing many notes of interest about the alumni.

### **Admission**

Applicants for admission must be not less than sixteen nor more than twenty years of age, and must be at least five feet in height. As to applicants for beneficiary scholarships, these rules will be strictly enforced; but in the case of pay cadets, among whom there is no competition for admission, the Board may exercise some discretion.

Applications for admission into the Academy must be made by parents or guardians to the Superintendent, and should be accompanied by a certificate from the principal or president of the school or college which the student last attended.

If this certificate shows that the student is sufficiently well prepared to enter the Fourth Class, he may be admitted without examination, otherwise he will be examined on the subjects mentioned in the paragraph following, which are the minimum requirements for admission.

The knowledge requisite for admission into the Fourth Class is the ability to read and write English with facility,

the elements of English grammar, arithmetic completed, algebra through quadratic equations, descriptive geography, and the history of the United States.

Upon presenting themselves for admission, Cadets may be admitted to a higher class if found competent upon examination, but it is advisable that students not over sixteen or seventeen years of age enter the Fourth Class, as the military work is very important, and unless a student is unusually mature he may find difficulty in keeping up the work of a higher class.

## **Expenses**

The Institution requires one fee, and supplies all the needs of the Cadets from this amount.

Being founded and supported by the State, and not conducted for profit, the Academy is enabled to offer very reasonable rates to pay cadets, only the cost of maintenance being exacted. Sixty-eight scholarships, distributed according to population, are awarded to worthy young men in the State who could not otherwise obtain a college education. These scholarships are worth three hundred dollars a year, and pay all the beneficiary's expenses.

The City of Charleston supports six free scholarships, which are awarded by competitive examination to young men of Charleston.

The State Legislature provides an appropriation which enables the Board to make one hundred allowances of fifty dollars each to pay cadets from South Carolina who pay two hundred and fifty dollars annually. The fees for pay cadets from this State are \$100 on Oct. 1st; \$75 on Jan. 1st; and \$75 on April 1st.

For pay cadets from outside the State, the charge is three hundred dollars a year, which is the cost of maintaining a cadet one year in the Academy. This covers board, clothing, fuel, lights, laundry, tuition, hospital fees, etc., and is paid in three instalments as follows: \$100 on Oct. 1st; \$100 on Jan. 1st; and \$100 on April 1st.

## **Extras**

All cadets must make annually a deposit of five dollars to cover damage to property. Any balance due cadets at the end of the session is returned to them.

Each new cadet must make a deposit of \$17.00 for a winter overcoat.

Each cadet is expected to purchase his text-books. New cadets should make a deposit of \$10.00 with the Quartermaster to cover this item.

Every cadet is allowed annually to draw on the Academy to the amount of \$62.00 for clothing. This amount is ample after the first year, but new cadets should come to the institution provided with sufficient underclothes for their first year, as the full allowance will be needed for uniforms. Experience shows that after the first year, the allowance is sufficient for clothing and books, if the cadet is careful. Any balance due the cadet at the close of the session is paid him in cash.

The hospital facilities at the Citadel are excellent, and all ordinary cases of sickness are treated by the physician and nurses of the institution without expense to the parent. Surgical cases, however, and special treatment of eyes, ears, etc., and dental services, are not included, and the expense of these, when necessary, must be borne by the parent or guardian.

## **Beneficiary Scholarships**

The State of South Carolina appropriates annually twenty thousand dollars for the support of sixty-eight cadets in the Academy. These scholarships are distributed among the various counties as shown on page 50 of Part II.

Notices of vacancies in these scholarships are advertised in the month of July each year in the newspapers of the counties where they exist, and also in the leading State daily papers. Applications for these beneficiary appointments must be made upon printed forms furnished by the County Superintendents of Education or the Superintendent of the

Academy, and must be filled out in every particular and returned to the Superintendent at the Citadel, who will lay them before the Board of Visitors for their approval.

As it is the intention of the State to limit the beneficiary appointments to worthy young men without means of obtaining a college education, certificates of inability to pay are required in these applications.

Such applicants as come under the provisions of the law will be granted permits by the Board of Visitors to appear before county examining boards, and will be notified of the time and place of the competitive examination.

Attention is called to the following extracts from the Regulations of the Academy relating thereto:

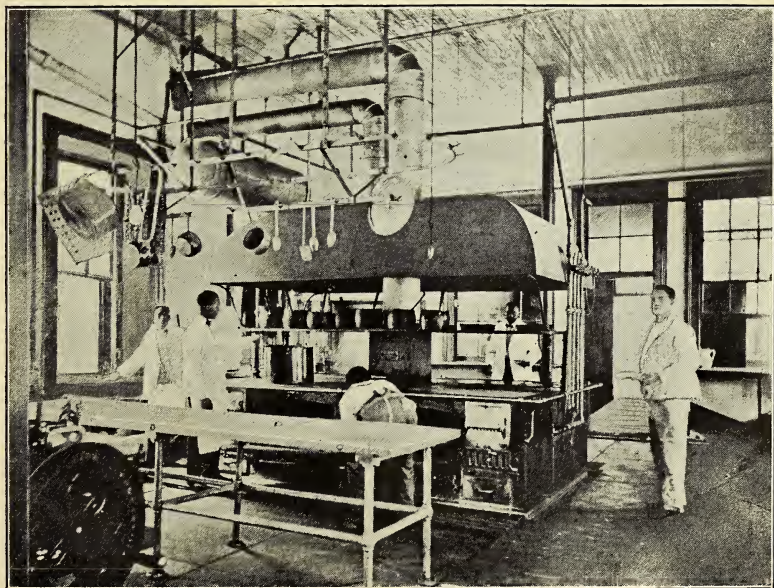

*Competitive Examination for Beneficiary Cadets.*—The competitive examinations for selection of Beneficiary Cadets from the counties, will be held at the respective county seats, and the candidates will, at as early a date as possible, after vacancies are announced, make application to the Chairman of the Board for permission to appear for examination before the County Board of Education, such examinations to be superintended by the State Superintendent of Education, and conducted under such rules as he may prescribe. The result shall be reported to the Superintendent of Education, who shall, when satisfied that the competition has been fairly conducted under the rules announced, report the results to the Chairman of the Board of Visitors. The Chairman of the Board of Visitors will forward to each successful applicant a Warrant of Appointment, who, upon receiving the same, will repair to the headquarters of the Academy by such day as the Board of Visitors may fix. He will be again examined by the Academic Board and Surgeon.

*Beneficiary Cadets, on Matriculation, Give a Bond.*—Every Beneficiary Cadet, upon reporting for duty and matriculating, shall file with the Superintendent of the Academy a bond payable to the Academy, in a penal sum sufficient to cover the expense of maintenance and education that may be incurred in his behalf, and conditioned for the faithful performance by said Cadet of his matriculation agreement

VIEWS ON MARION SQUARE.

to teach for two years after graduation in the free public schools of the State, as provided by law; and if honorably discharged before the completion of his course, then to teach for a period of time proportioned to the time he has been in the Academy. And unless the Cadet shall fulfil his obligation as aforesaid, he shall be deemed to have violated his contract, and the Academy will proceed by law for the collection on said bond of such amount as may be necessary to cover cost of the maintenance and education of said Cadet as may be proportionately due from his failure to teach the whole or any part of the time agreed as aforesaid.

And neither the infancy of the Cadet executing such bond, nor the Statute of Limitation, can be pleaded in bar of the recovery of said debt.

The Superintendent,

South Carolina Military Academy,  
Citadel, Charleston, S. C.

Sir:—

I have the honor to apply for the admission of my

(son or ward)

(given names and surname in full)

.....as a Pay Cadet in the South Carolina

Military Academy.

He was born.....

(date)

His height, measured in his stocking feet, is.....feet.....inches.

He was last vaccinated.....

(date)

He last attended.....

(name of school or college)

A certificate from the.....

(principal or president).....of the said.....

(school or college)

is hereto attached.

(Signature of parent or guardian)

## Ex Officio

HIS EXCELLENCY M. F. ANSEL, Governor,  
Columbia, S. C.

GEN. J. C. BOYD, Adjutant and Inspector General,  
Columbia, S. C.

HON. J. E. SWEARINGEN, State Superintendent of Education,  
Columbia, S. C.

HON. W. J. JOHNSON, Chairman Military Committee, Senate,  
Ridgeway, S. C.

HON. M. L. SMITH, Chairman Military Committee, House of Representatives,  
Camden, S. C.

## ACADEMIC BOARD

---

COL. O. J. BOND,  
Superintendent.

1ST LIEUT. W. ST. J. JERVEY, 10TH INFANTRY, U. S. A.,  
Commandant of Cadets.

MAJ. ST. JAMES CUMMINGS,  
Professor of History and English Literature.

MAJ. R. G. THOMAS,  
Professor of Mathematics and Engineering.

MAJ. P. B. WINN,  
Professor of Physics.

CAPT. JOHN W. MOORE,  
Professor of Political Science.

CAPT. LOUIS KNOX,  
Professor of Chemistry.

CAPT. L. S. LETELLIER,  
Professor of Drawing.

CAPT. L. F. HILDEBRANDT,  
Professor of French and German.

2D LIEUT. J. C. PATE,  
Assistant Professor of Mathematics.

2D LIEUT. J. D. CHARLES,  
Assistant Professor of English.

CAPT. H. E. RAINES,  
Quartermaster.

DR. R. S. CATHCART,  
Surgeon.

MISS INEZ B. PARRY,  
Librarian.

## CLASSIFICATION OF CADETS

The Cadets are arranged in four distinct classes, corresponding with the four years of study. The Cadets employed on the first year's course constitute the Fourth Class; those on the second year's course the Third Class; those on the third year's course the Second Class; and those on the Fourth year's course, the First Class.

The Academic Year commences on the last day of the Annual Encampment. On or before that date, the result of the Annual Examination, held in June is announced, and Cadets are advanced from one class to another. At no time shall a Cadet be advanced from one class to another, unless prevented by sickness, or authorized absence, from attending at the aforesaid examination, in which case a special examination shall be granted him; but in no case shall a Cadet be advanced from one class to another, without having passed a satisfactory examination by the Academic Board.

---

### NOTE

Those Cadets marked (\*) are officially selected for publication, conformably to a regulation which requires the names of the most distinguished Cadets, not exceeding two in each class, to be reported for this purpose at each Annual Examination.

---

### MERIT ROLLS

The mark on which the merit rolls are made are obtained by taking the number of marks, to get the average, then by multiplying by the "weight" of the department as established. The aggregates of these "final averages," with the Conduct Marks added in, determine the relative class standing of the Cadet. Elective studies are not counted in the final grading for graduation.

**WEIGHTS.** The weights given the various subjects are proportional to the time assigned them in the schedule of recitations.

In the First Class, the elective and non-elective studies each count as 50 per cent. of the aggregate.

**CONDUCT MARK.** The value of the Conduct Mark is fixed at 5 per cent. of the Academic aggregate.

**ACADEMIC STANDARD.** A minimum average of 50 per cent. is required in each department, and a "general average" of  $66\frac{2}{3}$  per cent. of the aggregate—not including the Conduct Mark—is required for advancement to a higher class and for graduation.

## CONDUCT ROLL

P. 53. Rolls exhibiting the relative standing of the Cadets in Conduct shall be formed by the Superintendent, at the June examination for the whole Academic Year, in the following manner:

1ST. MERITS. Merits shall be awarded to the Cadets upon the following basis.

For perfect Conduct for one week.....1

2ND. DEMERITS. To all the recorded delinquencies of the Cadets shall be affixed a number, not exceeding 10, corresponding to the degree of criminality.

3RD. The degree of criminality for the various offences shall be fixed by the Superintendent, subject to the revision of the Board of Visitors.

### Offences of the 1st Class by 10

"	"	"	2d.....	7
"	"	"	3d.....	5
"	"	"	4th.....	4
"	"	"	5th.....	3
"	"	"	6th.....	2
"	"	"	7th.....	1

4th. In determining standing on the "Conduct Roll," Merits and Demerits shall have correlative value.

P. 54 DEFICIENCY IN CONDUCT. When any Cadet shall have a number expressing his demerits on the General Conduct Roll greater than 200 for his Fourth Class Year, 170 for his Third Class Year, 150 for his Second Class Year, 130 for his First Class Year, such Cadet shall be declared deficient in Conduct, and be immediately suspended, and reported to the Board for acting on at its next meeting.

CADETS  
OF THE  
SOUTH CAROLINA MILITARY ACADEMY  
ARRANGED  
IN ORDER OF MERIT  
IN THEIR RESPECTIVE CLASSES  
FOR SESSION 1908-1909.

---

NOTE—The numbers give the relative standing of the Cadets in the various departments.
